ETHOS

Our Hub Café is striving to bring you an exciting variety of fun, healthy and creative alternatives to the more conventional menu, promoting a low to no sugar policy, along with the use of fresh, natural ingredients.

We work closely with other community groups and businesses who all have to work hard to survive in this remote rural area. Many of our customers have asked why we don't sell soup and sandwiches and food that other cafes do?

As a project that receives funding, unlike business owners, we took the stance that we did not want to compete with our business friends but rather complement what they do to make the area, as a whole, more attractive through variety of services and offerings. We are a close-knit community and mutual support is vital for all our success.

Our crepe batter is gluten free, however, because we use gluten products in our kitchen we cannot guarantee that there will be no cross-contamination. We will do our best to accommodate food allergies/intolerances – please speak to a member of staff prior to ordering.

As all our food is all home-made and freshly prepared on site, sometimes there is a small wait, and we thank you in advance for your patience.

We kindly ask that no food from out with the café is consumed on the premises.

We hope you enjoy your visit to The Hub. We would appreciate your feedback, forms are available in the café or at reception and can be posted in the suggestion box by the main front door.
